**RACINE, WI'S HISTORIC MOUND CEMETERY COMPLETES NEEDED EXPANSION  
New Garden Crypts Are First Expansion Since Cemetery Buildings Built in 1952**

**Mekus Tanager** recently completed a Crypt Expansion at Mound Cemetery in Racine, WI. The new complex will provide much needed inventory to Racine's historic city cemetery, which had run out of space for new burials. In total, the project provides 440 crypts and 480 niches.

The new buildings were designed with a soothing palette to complement and match the character of the historic architecture which they would be joining. An important part of the project was the restoration of a historic fountain, located at the focal point of the complex. The combination of natural stone and water has created a peaceful and serene place to reflect and remember loved ones.
